ANSWER DIGITAL AUTOMATION TEST

Information for Candidate:

The Answer Digital technical task is designed to test your test automation knowledge. You are required to create automated tests for each of the test cases. You are free to choose tools / frameworks and coding languages to complete this task.

The url for this automation test is http://the-internet.herokuapp.com/

Test Case 1:
To perform Test case 1, please click on **form authentication on Menu**

Test case 1: Automate Form Authentication

- Scenario 1: Try to login with correct username and wrong password and assert login validation
- Scenario 2: Try to login with incorrect username and correct password and assert login validation
- Scenario 3: Try to login with correct username and password and then logout

Test Case 2:
To perform Test case 2, please click on **Infinite scroll on Menu**

Test case 2: scroll to the bottom of the page twice and scroll back to the top of the page and assert "Infinite Scroll" text.

Test Case 3:
To perform Test case 3, please click on **Key presses on Menu**

Test case 3: Click on 4 keys and assert the text displayed after every key press

Submitting your solution:

Once completing the technical test, **please submit your whole project via a zip file or git repository.**

This so we can look at how candidates have coded their tests and we will be executing them locally to see if they work. You will need to have a

framework and working tests with executable code, so we will not be accepting solutions within a word document only.

If you have any questions regarding this technical test please contact your recruiter in the first instance or leed@answerdigital.com if you are a direct applicant.
